

Brushing machine

HA-600 / -800

westrup

HA3.08.1702.GB

The HA-600/-800 brushing machine is suitable to be used in grass seed installations, especially for splitting twin kernels

Estimated capacity on rye grass is for HA-600 1.0 t/h and for HA-800 1.5 t/h.

The unit has one inlet with screw and one common outlet.

Further with manually operated bypass system.

Three-section exchangeable mantle 1245 mm long with square wire mesh according to requirement.

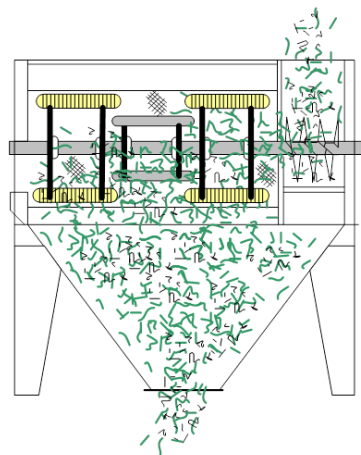

Rotor with 4 pcs. internally adjustable 0.9 mm nylon brushes.

Further with V-belt drive and motor; 5.5 kW for HA-600 and 7.5 kW for HA-800.

Connection dia. 100 mm for aspiration system on top of the machine.

The machine is of steel construction with the sides of waterproof laminated wood.

Weight of the machine is 585 kg for HA-600 and 750 kg for HA-800.

Options:

- Nylon brushes 0.5 mm
- Hair brushes 0.1 mm
- Beaters (instead of brushes)
- Arrangement for external adjustment of brushes/beaters
- Larger motor
- Variable speed drive
- End outlet
- Clamps for quick opening of the mantle
- Inlet with beaters and larger motor (instead of inlet with screw) (especially for HA-800 for grass seed)

DISTINGUISHING ADVANTAGES

- Heavy duty steel construction with the sides of waterproof laminated wood.
- Inlet with screw to ensure a controlled feed, also of very tangled products.
- Fitted with a manually operated bypass system when brushing is not needed.
- Rotor with hard-wearing internally adjustable brushes (several types available) to enable brushing of a wide range of products.
- Steel beaters are also available (optional) as well as arrangement for external adjustment of brushes or beaters (optional).
- Three-section mantle with square wire mesh to meet individual requirements.
- The mantle is easily exchangeable making clean-down, when changing from one product to another, very easy.
- Can be supplied with end outlet (option) to take out the majority of large particles.
- When cleaning grass seed, the HA-800 can be equipped with inlet with beaters (option instead of inlet with screw).
- Prepared for easy connection to an aspiration system giving dust free operation.
- Low maintenance costs and one-year parts warranty.
